Gianky NFT

02.03.2023
—

Overview

Platform including a betting website, NFT website and Gianky Coin

NFT website requirements

1. Should be able to buy NFTs using bnb (6 types NFT with unlimited supply)

   1. Starter   = $ 20 worth bnb
   2. Basic   = $50 worth bnb
   3. standard = $ 100 worth bnb
   4. VIP   = $ 500 worth bnb
   5. Premium = $ 1000 worth bnb
   6. Diamond   = $ 5000 worth bnb

   Prices should be shown in bnb (at current market price related to above mentioned prices)

2. Button which take them directly to swapping page of Gianky token in pancakeswap
3. Team member details
4. Section which describes about the benefits and goals.

Benefits of NFT

1. They Recieve Flat 10 percent cashback in form of Gianky coin

   Starter receives 2 dollar worth gianky, basic receives 5 dollar worth gianky Standard receives 10 dollar worth gianky at that time

   VIP receives 50 dollars worth gianky

   Premium receive 100 dollar worth gianky

   Diamond receive 500 dollar worth gianky

2. Referral rewards divided into 4 levels
   Level 1 receives 12.5 percentage of the NFT price
   Level 2 receives 8 percentage
   Level 3 receives 4 percentage
   Level 4 receives 2 percentage

   Anyone who complete 20 referrals of same type receives extra 100 percent cashback the price of the 1 NFT of same kind

For any referrals after completing 20 referrals of one type, they get 5 percent cashback extra on each referral (this applies for only type of NFT that has completed 20 referrals)

Diamond members receive rewards for all type of referrals
Premium members receive rewards for premium, vip and standard
Vip members receive rewards for VIP and standard referrals
Standard members receive rewards for standard, basic and starter

Basic members receives rewards for basic and starter

Starter members receives rewards for starter only

3. Royalties from the transactions of NFT
Level 1 receives 12.5 percentage of the collected royalty amount
Level 2 receives 8 percentage
Level 3 receives 4 percentage
Level 4 receives 2 percentage

4. Exclusive offers in betting website
5. Discounted rate of 5 percentage while purchasing using gianky coin
6. Passive income from indirect referrals

Smart contract details

- Gianky token rewards (10 percent of NFT price worth tokens) should be credited to the purchasing wallet along with the NFT automatically
- If the liquidity pool is not created, the 10 percent cashback will be given in form of gianky at the rate 0.005 dollar per gianky
- If the liquidity pool for Gianky is created, 10 percent cashback will be given in form of gianky by purchasing the equivalent gianky from the liquidity pool using the bnb received for NFT purchase. (this will enable the gianky coin value go up on NFT sale, and Gianky coin smart contract will automatically add some percentage to liquidity pool - gianky coin smart contract is already deployed).
- Referral details should be stored based on NFT token ID.
This will help to reward the referred peoples even after the NFT is sold
(royalties will be distributed to the same people who received the rewards on referrals)

- Value of the NFT or rarity is determined by the number of each type of NFT that is referred using the given NFT token ID
  Eg: i purchase 1 diamond using NFT token ID 1000 and my friend bought standard NFT using NFT token ID 1000, this NFT should have more value while selling than an NFT token ID that referred 2 standard NFT
- While purchasing NFT, referrals is determined by the NFT token ID,
  Eg, while purchasing NFT, i enter token ID 1000. The level 1 reward will go to the holder of token ID 1000, level 2 reward goes to holder of token ID which was entered while purchasing NFT token with ID 1000 and so on.
- Price of NFT should be shown in both bnb and Glanky coin, if they use gianky, they get discounted rate of 5 percentage.
- Count of each type of NFT referred by a given ID should be tracked, because we will be providing 100 percent cashback amount of 1 NFT of the same type if they complete 20 referrals of a same type
  Eg: if i refer 15 standard NFT and 20 diamond NFT, i receive 1 diamond NFT price cashback (5000 dollars, since i completed 20 referrals of diamond NFT)
- 5 percent royalties, considering this 5 percent as 100 percent, 12.5 percent of that collected amount should be credited to level 1, 8 to level 2, 4 to level 3 and 2 to level 4
- If anyone purchase NFT without entering NFT token ID for referral, the whole amount of NFT will be credited to the payment splitter smart contract address which splits the payments into different wallets.
- If anyone purchase NFT using referral token ID, the amount that is left after distribution of rewards should be credited to the payment splitter smart contract address.

Phase 2

- NFT staking to receive gianky coins and access premium features in betting website
- Users can stake their NFT in the website
- Those who do not want to make use of the referral system can stake their NFT, These members will be credited with gianky coins in their wallet proportional to the period of time they stake the NFT.

Liquidity pool creation

Gianky coin total supply = 21m

Presale value of gianky = 0.005 dollar for 1 gianky

1m gianky —-> to airdrop to previous holders

Check point 1
When Liquidiy pool wallet have 25k dollar worth bnb,
Add 25k dollars and 5m gianky into liquidy pool to have listing value 0.005 dollars for 1 gianky

At this point of time, 1.25 m gianky would be already distributed as rewards.

Remaining 14.75m gianky can be used for later business purposes including the NFT staking.
